

Power In The Palm Of Your Hand!

The Sioux Tools 5045 3/8" Heavy Duty Butterfly Impact Wrench puts total control in the palm of your hand. The butterfly throttle allows for easy one hand directional changes. This is particularly useful when working in tight spaces.

The Model 5045 features a lightweight aluminum housing for superior strength without adding to the weight of the tool. It has an 8-position power regulator knob to give the operator an extended range of control. The built-in air inlet swivel allows for precise positioning even in tight, hard to reach places.

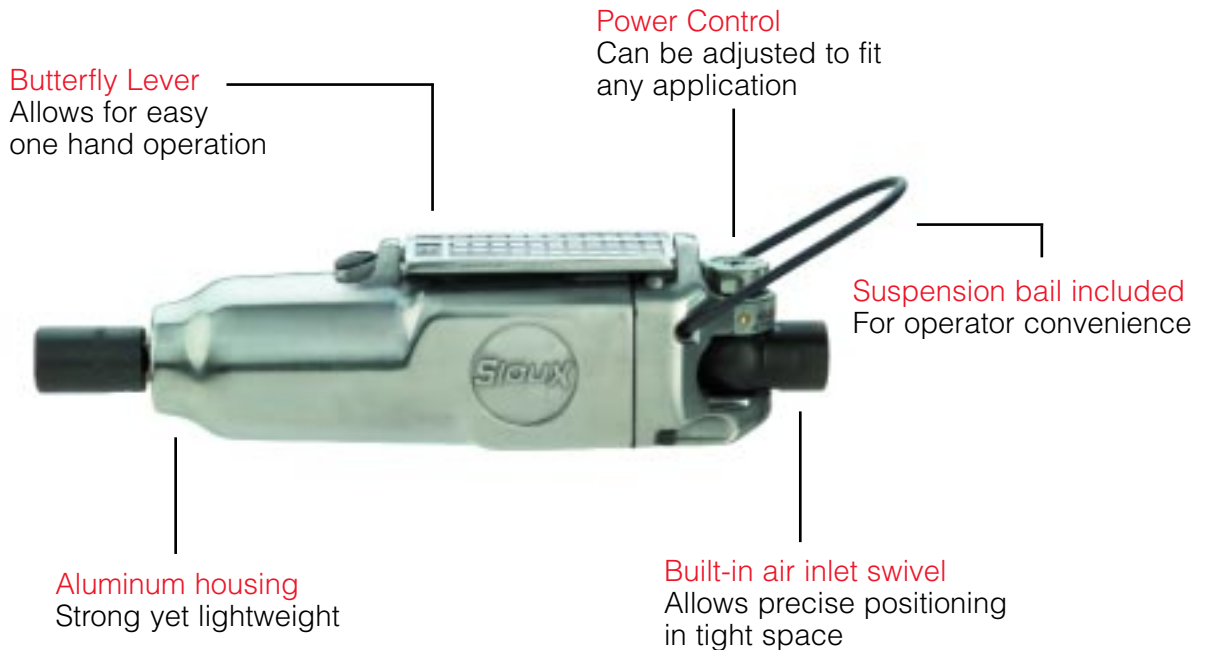

The 5045 series Heavy Duty Butterfly Impact Wrench is available with either a ring or pin socket retainer. There is also a suspension bail included to make the tool easily accessible to the operator.

With a working torque range of 15 – 160 ft lb (20 – 170 Nm) the 5045 Heavy Duty Butterfly Impact Wrench has the power to handle a variety of applications such as general industrial assembly, MRO and automotive maintenance and repair to name a few.
