

GO BIG

OR GO SMALL

The **Big 1300 17.2" Reciprocating Saw**

Our D-handle design allows you to lean in and really put your weight behind it - no surprise this big guy is considered the heavy duty workhorse for Metal Fabrication Shops, Ship Yards and Truck Manufacturing. Perfect for cutting steel, pipes, large wood, and doing demolition work.

1300 17.2" SPECIFICATIONS:

- Free Speed: 1,800 spm
- Stroke Length: 0.6" (15mm)
- Lock-off Trigger Start
- Variable Speed
- Swivel Air Inlet
- Protective Boot

The **Small RS10K 9.4" Reciprocating Saw**

Ideal for cutting drywall, composites and fiberglass. Plus, it has the power to cut up to 1/8" (3mm) mild steel. You can't beat its small size for making intricate cuts- and the soft ergo grip reduces vibrations so your hand doesn't go numb. Perfect for Marine, RV, Plastics and Construction jobs.

RS10K 9.4" SPECIFICATIONS:

- Free Speed: 10,000 spm
- Stroke Length: 0.375" (10mm)
- Lock-off Lever Start
- 360 Adjustable Exhaust Deflector
- Dual Chuck Accepts: 0.035" Standard Air Saw Blades and Standard Reciprocating Saw Blades
