

GET A BETTER

GRIP

WITH A PERSONALIZED FIT

Random Orbital Sander

Removable Cover

Designed soft like the human hand, just place the removable cover in your palm and orient it to the most comfortable position. Re-attach and now you have successfully created a personalized fit. Works for any size hand, righty or lefty.

Inside Cover

The 24 notches inside the cover are designed to stop any shifting once the cover is placed back on the grip. Guarantees a tight snug fit.

Curved Operating Lever

Like the human hand our Operating Lever has a curvature. It eliminates all the pressure points from the grip and the paddle-so you can engage the power when your hand is at a normal resting position.

**THE MORE COMFORTABLE
THE TOOL THE MORE
PRODUCTIVE THE OPERATOR.**
